## About you

**What's your name? \***

First Name

Last Name

**What's your preferred email address? \***

example@example.com

**Where do you call 'home'?**

**How would you define your main area of expertise or interest? \***

**How would your friends describe you in just 5 words? \***

## Your experience

**Do you have a LinkedIn profile you'd be happy to share?**

**Tell us about a project you're proud of \***

## Your development

The Solvers Community is one where there is emphasis on shared learning, continual development, open-mindedness, and a focus on improving our collective understanding of complex challenges.

**Through membership of the Solvers Community, what 'type' of designer are you seeking to become? \***

A 'Regenerative Designer'

A 'Systems Designer'

An 'Equity Designer'

All of these

None of these

**How would you describe your status on your development journey?**

Beginner / Novice

Some knowledge but no practice

Some knowledge and had some practice

Lots of relevant knowledge and good understanding, but no real practice

Knowledgeable and lots of practice

Really experienced - this is what I do for a living!

I literally wrote the book

## The Community

Our community space is accessible online, and has members from around the world who are joined together by their own desire to learn, share, connect and collaborate. Nobody in the community has 'the answers' - people are here to offer their existing skills and knowledge whilst continuing to develop their understanding of what it means to be a regenerative, equity and/or systems designer.

Therefore it is diverse and multidisciplinary, with a culture of openness and curiosity. Active discussions, sharing resources, regular events and talks, workshops, co-learning and coaching are all a feature of our

community environment, with activities always being developed and driven by the needs of the community.

### *Community behaviours*

As you may expect, we have set principles and guidance for community members. These can be seen via [this link](#).

### *Is it right for you?*

The community is a mixture of experience and different levels of knowledge and understanding, so if you're looking for an 'expert-only' space, then this probably isn't right for you.

We also have a focus on Action Learning, and we're here to support each other in creating impact through applying our learning in the 'real world'. The community exists to support each other in this endeavour and to seek collaborative opportunities to undertake projects. Those looking to contribute and actively participate in designing and creating for community-led projects will always be prioritised for admission to Solvers community. This is a **community of practice**, and therefore there's an expectation members will act, as well as talk and share.

**From the information you have, tell us how you believe the Solvers Community is the right place for you and how you think it can help you thrive \***

**There's a whole host of activities and opportunities within the Solvers community. Highlight your 'top 3' from the list below. \***
